(Original): A method to confer, improve, enhance or modify the odor 1. properties of a perfuming composition or a perfumed product, which method comprises the step of adding to said composition or product a compound of formula

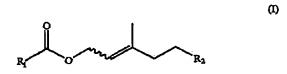

$$R_2$$
 (0)

in which the wavy line represents a bond having a configuration of the type (Z) or (E), or a mixture of the two configurations; R1 represents a hydrogen atom, a C1 to C4 linear or branched alkyl radical, a methoxy or ethoxycarbonyl radical, or an aryl radical, and R2 represents a methyl or ethyl group.

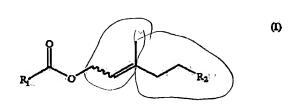

in which the wavy line represents a bond having a configuration of the type (Z) or (E), or a mixture of the two configurations; R1 represents a hydrogen atom, a C1 to C4 linear or branched alkyl radical, a methoxy or ethoxycarbonyl radical, or an aryl radical, and R2 represents a methyl or ethyl group.

(Original): Perfuming composition or perfumed article according to claim 3, 4. wherein the active ingredient is 3-methyl-2-hexenyl acetate, 3-methyl-2-heptenyl acetate or 3methyl-2-hexenyl propanoate.

- 5. (Original): Perfuming composition or perfumed article according to claim 3, wherein the active ingredient is 1-ethyl 2-(3-methyl-2-hexenyl) oxalate or 3-methyl-2-hexenyl salicylate.
- 6. (Original): Perfumed article according to claim 3, in the form of a perfume, a cologne, an after-shave lotion, a soap, preparations for the shower or the bath, a body-care product or hair-care product, a deodorant or antiperspirant or an airfreshener, a cosmetic preparation, a detergent or fabric softener or an all-purpose cleaner.

7. (Original): Compound of formula

in which the wavy line represents a bond having a configuration of the type (Z) or (E), or a mixture of the two configurations; R_1 represents a hydrogen atom, a C_1 to C_4 linear or branched alkyl radical, a methoxy or ethoxycarbonyl radical, or an aryl radical, and R_2 represents a methyl or ethyl group provided that 3-methyl-2-hexenyl acetate and 3-methyl-2-hexenyl acetate or 3-methyl-2-hexenyl propanoate.

- 8. (New): The compound according to claim 7, which is 3-methyl-2-hexenyl acetate or 3-methyl-2-hexenyl salicylate.
- (New): The method according to claim 1 wherein the compound is present in an amount sufficient to impart a green, fruity odor to the composition or product
- (New): The perfuming composition or perfumed article according to claim 3 wherein the compound is present in an amount sufficient to impart a green, fruity odor to the composition or product
